MONKEY HEAVEN 120ml / 4fl.oz

FUEL BOTTLE

DANGER

Methanol 76.6%, ethanol 21.4%, isopropanol 0.3%

Alcohols are one of the major metabolites in the living body, and a wide variety of alcohols are widely found in the living body. Wax is a higher alcohol such as cetanol, and fat (neutral fat) is an ester of glycerin and fatty acid. And sugars are also alcohols. Erythritol, xylitol, sorbitol, etc., in which the carbonyl group of ketose or aldose is reduced, are called sugar alcohols.
